

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring requirements not met for

Midland PSD WV 3304208

Our water system violated drinking water monitoring requirements. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during this time.

What should I do?

There is nothing you need to do at this time.

The table below lists the required monitoring and compliance period.

Monitoring Violation	Year -Fed Report #	Monitoring Frequency	Compliance Period
36, MONITORING, RTN/RPT MAJOR, CHLORINE Missing Required Chlorine Residual Associated With a Bacteriological Sample or Entry Point to the Distribution	2026 60440	Monthly	AUG 2025
3A, MONITORING, ROUTINE, MAJOR (RTCR) Valid Compliance Total Coliform Sample Not Received	2026 60438	Monthly	AUG 2025
WB, CHLORINE, MOR Incomplete/Not submitted as Required or Missing Res. CL from Coliform Result	2026 60439	Monthly	AUG 2025

What happened? What is being done?

The missing chlorine residual was due to a lab reporting error, out of Midland PSD's control. A corrected result was submitted on October 28, 2025. Due to this error, the WV BPH deleted Chlorine residual values listed on the August 2025 MOR report. Midland PSD will continue proper monitoring and reporting procedures.
